

PF VERLATORI 3DR

3D forming press

Performance and engagement for the food industry

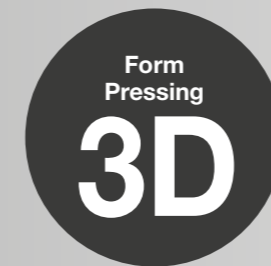

With over 40 years of experience in the food industry sector, we have a strong track record of delivering **high-quality equipment**. **Pujolàs** designs, develops, and manufactures equipment for the production and processing of **food products**. We combine traditional techniques with the latest innovations to achieve high-quality results and significant added value. Efficiency and performance in every product are our commitment.

PF VERLATORI 3DR

Meat forming and pressing machine designed to maximize yield during the slicing process.

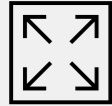

- ✓ Automated 3-dimensional forming press.
- ✓ Self-regulating pressing pressure based on product type.
- ✓ Automated loading and unloading to minimize product handling.
- ✓ Easy mould changing.

A new generation of fully automated three-dimensional forming presses has been designed to meet **the most demanding standards in hygiene and productivity**. This innovative press concept allows for total **adaptation and customization**, ensuring that the equipment meets the most specific requirements. It also features **specific in-line automatic loading and unloading systems** to avoid product manipulation.

PF VERLATORI 3DR

Waste-free efficiency

We adapt to your needs.
Contact us

Control panel

Select and load the type of product to be produced. With access keys according to the operating level.

Pressing system

Respect for the product, avoiding muscle tears.

Easy mould changing

Quick, in less than 2 minutes and without the need for special tools.

Quality and versatility

Adjustment of pressing force according to the type of product to be formed.

Intuitive

User-friendly graphical interface.

Productivity

Up to 6 - 9 cycles per minute. Variable depending on product characteristics.

Pujolàs Benefits

Waste-free product efficiency.

Maximization of yield during the slicing process.

For pressing tender, semi-frozen, or fully frozen meats.

Automatic loading and/or unloading according to our clients' requirements.

Homogeneous and compact product ensuring maximum yield.

Safety system

Doors and openings specially designed to allow viewing of the production process.

Hygienization

Fully accessible to ensure thorough cleaning.

Guaranteed Quality

- ✓ Electro-hydraulic system: solenoid valves, cylinders, filters, and components from top brands.
- ✓ Equipment built entirely in stainless steel.

Hygienic Design

- ✓ Hygienic push buttons to allow high-pressure water.
- ✓ Conveyor belt easily washable from below.
- ✓ Inclined surfaces for water drainage.

Safety System

- ✓ Emergency stop in the most frequent areas.
- ✓ Access protected by safety sensors.
- ✓ Centralized safety systems in all openings.

Robust and Solid

- ✓ Double-cylinder pressing system with pressure regulation.
- ✓ Internal structure entirely made of stainless steel.

Configure your pressing system

The PF 3DR pressing system offers a wide range of solutions thanks to its modular system that allows it to adapt to the desired production system. With front or side automatic loading, process automation, double-line production, and even cutting system.

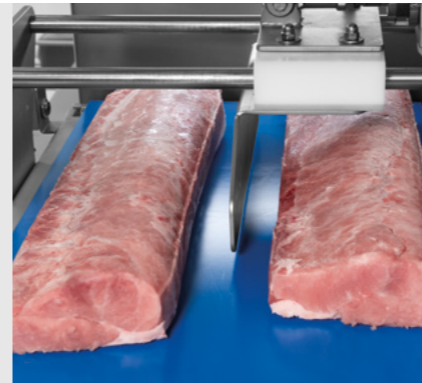

Manual side loading

PF VERLATORI 3DRL

This option is designed for customers who prefer to work in-line. With this addition, the mould length is increased to 800 mm.

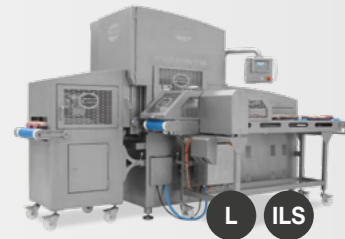

L

Synchronized dual-piece output

PF VERLATORI 3DRL + ILS

Manual or in-line side loading and synchronized two-piece output.

L ILS

Automatic side loading

PF VERLATORI 3DRL + S

Automated to meet the most demanding standards in hygiene and productivity.

L S

Synchronized dual-piece output with elevator

PF VERLATORI 3DRL + ILS 220

Manual or in-line side loading. Synchronized dual-piece output in-line at the slicer height level.

L ILS 220

Automatic front loading

PF VERLATORI 3DR + S

Without interruptions from product entry to packaging.

S

In-line output with cutting system

PF VERLATORI 3DR + S + PGT

Press with guillotine for cutting meats in half or into multiple cuts, custom-designed.

S PGT

Optional accessories

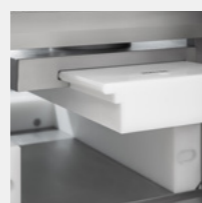

PF 3DR / XXL version

Custom-built press specially designed for products with extreme dimensions.

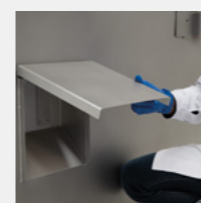

PF 3DR / 2 version

Equipment designed for pressing two pieces simultaneously.

Additional moulds

Designed and built according to the characteristics of the product to be pressed.

Provisions and connections

Includes connectors, wiring, and electronic components necessary to facilitate the addition of a loading and/or unloading system in the future.

Mold storage trolley

Accessory to facilitate mould storage and cleaning.

Online remote access

Modem that allows remote access for Pujolàs technicians.

Performance and engagement for the food industry

Since 1985, we have been innovating to deliver results that replicate the artisanal process while maintaining quality and increasing profits.

PILOT PLANT
R & D Center

Working hand in hand with our customers.

Want to assess the performance of your product?

At our Pilot Plant, our research and development center, you will find a showroom of our equipment. You can conduct tests and trials of the machinery and evaluate the development of your product.
