

RVC 625

System for depalletizing and emptying of boxes

RVC 625

Efficient and automated emptying

The RVC 625 is an advanced system for automatic depalletizing, destacking, and emptying of boxes. Ideal for industries such as food processing, manufacturing, logistics, and recycling, this box depalletizing and tipping system is a strategic investment for any industrial operation seeking to maximize efficiency and safety.

We adapt to your needs.
Contact us

Versatility

Capable of handling various box sizes, adapting to the specific needs of different industries.

Low Maintenance

Requires minimal preventive maintenance, ensuring continuous and uninterrupted performance.

Full Pallet Entry Area

Equipped with a precision lifting system that adjusts to the height of all types of boxes.

Loading Zone

Ejection system directs empty boxes to sanitation or stacking equipment.

Emptying Zone

A 360° rotary system ensures precise and controlled emptying, preventing spills and product damage.

Pujolàs Benefits

Effortless depalletizing and emptying of boxes.

Custom-built system, tailored to the type of product and box being emptied.

Maximizes productivity with a system designed for uninterrupted operation.

Exit Zone

Ejection system directs empty boxes to sanitation or stacking equipment.

Operations Panel

Allows the programming of different cycles based on the number and type of boxes to be emptied.

Comprehensive Safety

Integrated safety mechanisms guarantee full protection during the depalletizing and emptying process.

Robust Construction

Built with high-quality materials to ensure durability and resistance in demanding industrial environments.

3 RVC 625 Line

Performance and engagement for the food industry

With over 40 years of experience in the food industry sector, we have a strong track record of delivering **high-quality equipment**. **Pujolàs** designs, develops, and manufactures equipment for the production and processing of **food products**. We combine traditional techniques with the latest innovations to achieve high-quality results and significant added value. Efficiency and performance in every product are our commitment.

PILOT PLANT
R & D Center

Working hand in hand with our customers.

Want to assess the performance of your product?

At our Pilot Plant, our research and development center, you will find a showroom of our equipment. You can conduct tests and trials of the machinery and evaluate the development of your product.
